Claim 21:
Replace "system" in line 1 with "method"

Allowable Subject Matter

4. Claims 1-3 and 5-21 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The Examiner has carefully considered the independent claims 1 and 13. The "system" and "method" for managing concurrent inputs from multiple devices in response to a query as claimed was not taught or suggested by the prior art.

Specifically, none of the prior art of record fairly teaches or suggests limitations "providing a query turn indicator", "transmitting the unique identifier and the query turn indicator with the query to the multiple devices", "attaching the unique identifier and the query turn indicator to the inputs generated via the multiple devices", "comparing the unique identifier and the query turn indicator received with the inputs with the unique identifier and the query turn indicator corresponding to the query and stored in the

memory device", "accepting the corresponding one of the inputs when a match is determined, and discarding the inputs responding to the query that are identified as subsequently received via their respective query turn indicators" in a specific combination as recited in claims 1 and 13. These limitations define patentably over relevant prior art made of record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
